Technical Specification

# What is the Smooth Operator?

The Smooth Operator is a complete product consisting of a Universal Robots UR10e Robotic arm combined with a Robotiq end effector (gripper system) guided by software and additional sensors to effectively automate existing CNC machine tools.

# HOW DOES IT WORK?

**First the Smooth Operator Uses a wrist guided camera to identify parts to be machined, determines the best way to pick them up and then places them in your CNC machine.**

Then the machine tending software enables a pneumatic switch to press the cycle start button. Tower light sensors monitor the status of the CNC machine until the cycle finishes and then the robotic arm removes the part and replaces it with the next job, rinse and repeat until all your jobs are completed!

### **Is it hard to program?**

No, anyone can learn to set up and deploy/redeploy the smooth operator, it works very similarly to conversational CNC machine controls in that you outline movement zones and can pick sections of previous programs to use in future setups!

### **Is it safe?**

#### **Where are the cages and laser grids?**

The Smooth operator is a Collaborative Robot, or COBOT for short, as such it has force sensors built into every joint, as soon as one of these sensors detects an anomaly (i.e. it bumps into something) it will pause to let you clear the obstruction.

### **But I don't have an automatic door!**

Not a problem, the Smooth Operator can open and close the door of your machine just as an operator would.

## **Where do the finished parts go?**

**Wherever you would like them to!**

The Smooth operator can be programmed to drop finished parts into several places and configurations, such as onto a conveyor belt, into a bin, down a chute, Its really up to you!

# Robot arm

## Technical specification

### Specification

|  |   |                  |                    |   |                   |

# WRIST CAMERA

VISION MADE FOR UNIVERSAL ROBOTS

## EASY TO USE

- Teach, edit, and run via the teach pendant
- Accelerate changeovers with Visual Offset
- Operate with any expertise level

### CAD IMPORT

### VISUAL OFFSET

### ODE READING

## APPLICATIONS

PICK & PLACE

## MACHINE TENDING

QUALITY TESTING

ASSEMBLY

## FEATURES

### CAD Import

### One-click workplane

### Auto-pick

### Parametric part teaching

### Gripper clearance check

### Visual offset

### 1D and 2D barcode reading

### Image saving

### Shape programming wizard

### Assembly management

## BENEFITS

- ▶ Teach a model using your own CAD file
- ▶ Create additional workplanes for your pick and place application with only one click
- ▶ Automatically creates the picking action with a centered position
- ▶ Ideal for faster blank programming
- ▶ Robust program minimizes production downtime
- ▶ Use the Robotiq tag to offset the robot program and accelerate changeovers
- ▶ Perform real time quality control
- ▶ Trace parts in a product assembly  
Program picture parameters for a personalized visual traceability
- ▶ Program complex parts in minutes
- ▶ Simultaneously manage different parts for flexible assembly sequences  
Enables robot to work in structured or unstructured environments

## SPECIFICATIONS

|                              |  |
|------------------------------|--|
| Sensor & Optics              | 5 MP color sensor, electrically adjustable focus, 70 mm to infinity  |
| Integrated Lighting          | Two units (diffused white LED)   |
| Programmable Parameters      | <ul style="list-style-type: none"> <li>• CAD file import teaching (.dxf)</li> <li>• Automatic part teaching (user defined arbitrary shape)</li> <li>• Parametric part teaching (circle, ring, square, rectangle)</li> <li>• Edge editing, object color and clearance validation</li> <li>• Automatic and manual camera parameters: exposure, focus, LED lighting, white balance</li> </ul> |
| Electrical                   | Direct communication with UR controller (via USB), and power supply from controller (24 V)   |
| Mass                         | 160 g  |
| Operating Temperature        | °C to 50°C   |
| Camera Internal Image Buffer | DRAM memory  |

# HAND-**E**

ADAPTATIVE GRIPPER

## THE GRIPPER FOR COLLABORATIVE ROBOTS

- Plug + Play and easy to program
- Ideal for precision assembly tasks
- Ergonomic shape for hand-guiding
- Built for industrial applications and harsh environments
- Automatic part detection, position feedback, and part validation

| SPECIFICATIONS  | HAND-E             |                |
|---|--------------------|----------------|
| Stroke (adjustable)   | 50 mm              | 2 in           |
| Grip force (adjustable)   | 20 to 185 N4       | .5 to 41 lbf   |
| Form-fit grip payload   | 5 kg               | 11 lbs         |
| Friction grip payload*  | 4.7 kg             | 8.8 lbs        |
| Gripper mass  | 1 kg               | 2 lbs          |
| Position resolution (fingertip)   | 0.2 mm             |                |
| Closing speed (adjustable)  | 20 to 150 mm/s0    | .8 to 5.9 in/s |
| Communication protocol  | Modbus RTU (RS485) |                |
| Ingress protection (IP) rating  | IP67               |                |
| * Calculated for the use of silicon covered fingertips to grip a steel object, at a low robot acceleration.   |                    |                |
| ** All specifications provided for reference only. See user manual at <a href="http://support.robotiq.com">support.robotiq.com</a> for official specifications. |                    |                |
